Functions

Cobalto E-Flow has the following operating modes:

- Electric towel warmer
- Fan
- Electric towel warmer and fan

The towel warmer has five functions:

- Comfort mode: the chosen temperature is regulated by the remote control
- **Night mode:** the electric towel warmer is regulated at 2°C below comfort temperature
- **Pilot wire mode:** the electric towel warmer can be adjusted remotely through a central electric radiator regulation system (mode available only in homes fitted with such a system)
- **Timer mode:** using the remote control, the on and off times of the towel warmer can be programmed hour by hour for the seven days of the week
- **Two hour override function:** when this function is activated, the radiator operates at maximum power for two hours to heat the room rapidly.
- **Freeze prevention function:** when the dial is on minimum, the towel warmer comes on automatically when room temperature drops below 7°C.

Remote control included
